

**FREEDOM PROTOCOL**

**LITE PAPER**

**V 1.0**

# DISCLAIMER

The LITE Paper (the lite Paper), as it may be amended from time to time, is hereby incorporated by reference. Freedom Protocol LLC (Company) will distribute the Freedom tokens (Tokens) to buyers (Buyer) pursuant to the Freedom Smart Contract (the Smart Contract). Company makes no representations or warranties, express or implied, including any warranties of title or implied warranties of merchantability for a particular purpose with respect to the Contract or Tokens or their utility or the ability of anyone to purchase or use Tokens. Without limiting the foregoing, none of the Company parties represent or warrant that the process of purchasing and /or receiving Tokens will be uninterrupted or error-free or that Tokens are reliable and error-free. As a result, Buyer acknowledges and understands that Buyer may never receive Tokens and may lose the entire amount Buyer paid to the Company. Buyer shall provide an accurate digital wallet address to Company for receipt of any Tokens distributed to Buyer pursuant to the Contract. The sale of Tokens and Tokens themselves are not securities, commodities, swaps on either securities or commodities, or a financial instrument of any kind. We have received a memo from our attorneys stating that our token is a utility token. Accordingly, this document does not constitute investment council, advice, or solicitation for investment in any security. Purchases and sales of Tokens are not subject to the protections of any laws governing those types of financial instruments. This Agreement and all other documents referred to in this Agreement, including the LITE Paper, do not constitute a prospectus or offering document and are not an offer to sell nor the solicitation of an offer to buy an investment, a security, commodity, or a swap on either a security or commodity. Buyer should not participate in the Freedom token Distribution or purchase Tokens for investment purposes. Tokens are not designed for investment purposes and should not be considered as a type of investment. Company has prepared this LITE paper for the sole purpose of introducing the technical aspects of Freedom Protocol, its associated platform components, and its underlying blockchain protocol. This document does not constitute any offer, solicitation, recommendation, or invitation for or in relation to the securities of any company described herein. The LITE Paper is not an offering document or prospectus and is not intended to provide the basis of any investment decision or contract. The information presented herein has not been subject to independent audit, verification, or analysis by any professional legal, accounting, engineering, or financial advisors. The LITE Paper does not purport to include information that Buyer might require to form any purchase decision, nor does it comprehensively address risks of Tokens, which are numerous and significant. Company (along with its directors, officers, and employees) does not assume any liability or responsibility whatsoever for the accuracy or completeness of information contained in the LITE Paper or for correcting any errors herein. Furthermore, should Buyer choose to participate in the initial sale of Tokens, Company does not assume any liability or responsibility whatsoever for any loss of market value of Tokens. The content of the LITE Paper may be challenging and require a high degree of familiarity with distributed ledger technology to comprehend Tokens and associated risks. Readers of this document are encouraged to seek external advice and are solely responsible for making their own assessment of the matters herein, including assessing risks and consulting technical and professional advisors.

# INTRODUCTION

The rise of blockchain technology is considered one of the hottest topics in today's tech market. It is a digital, decentralized, public ledger used for all cryptocurrency transactions. Once each transaction is completed, it is added to a previously completed block in chronological order which forms a blockchain. Integrating decentralization as a major component of the blockchain technology empowers members of complex networks to collaborate without the necessity of the presence of centralized authority. This helps to boost productivity in many ways, lowering transaction costs and other forms of inefficiency that exist while doing business with these agents.

Despite having been first designed as the infrastructure for supporting the processing and transaction of bitcoin, the world's largest digital currency, its usage has now grown well beyond that. Other uses of the technology can be built using Smart Contracts to handle digital assets in several different industries. Blockchains are now being viewed as having the ability to transform the global financial system and other industries by disrupting the current structure of intermediaries. A report conducted by the World Economic Forum projects that blockchain technology would alter financial services, with 10% of global GDP (about \$7.4 trillion) estimated to be kept on blockchain platforms by 2025.

Bitcoin (and cryptocurrency mining) shot up to an all-time high of about USD 20,000 in 2017, both due to its surge in price and the expansion of crypto mining, where the prospect of "free money" drew in a wave of enthusiasts throughout the world.

# MARKETPLACE

Over the past year, the use of cryptocurrencies, such as crypto tokens and other digital assets based on blockchain technology, has seen a period of rapid growth. Blockchain technology makes it possible for the first time to have a truly global store of value, and the number of wallets has seen a dramatic increase in the last few months. At the beginning of 2017, Bitcoin was at the top of the cryptocurrency world with a market capitalization of 12 billion US dollars. On paper, Ethereum was worth 700 million USD while it was still a relative newcomer to the cryptocurrency market. To start the year, Bitcoin's market value rose from 12 to 32 billion USD in just a matter of weeks. Ethereum also experienced an explosive rise during the first two months of the year, and as of April 2021 it has a market value of 28 billion USD.

The market is enthused by blockchain technology and the decentralization of currency that blockchain technology and cryptocurrency provide. It is estimated that well over 4000 different cryptocurrencies currently exist, and each has a new use case for blockchain being created on a weekly basis. Selecting the correct cryptocurrency is essential, as there are important things to consider including checking if there is anything wrong with the team, the technology, or the concept.

# FREEDOM TOKEN

Freedom Token is a new crypto venture by a group of professionals in the medical field. It is a new addition in the pool of thousands of already existing cryptocurrency coins and tokens. But this is more than just a token. Freedom Token is intended to give value to the token holder. The goals of Freedom Token are revolutionary, and the team is working hard on achieving those goals. These plans will surely impact the lives of many people. It is creating a revolution around the world in the field of post-COVID-19 using decentralized blockchain.

The main purpose of Freedom Token is to create a decentralized platform that will help individuals and families that were affected by COVID-19 through charity. Freedom Protocol will partner with various medical organizations in the US and around the world to give them a hand in their Covid 19 operations. Freedom Protocol will have the power to donate with the freedom token (charity wallet) and through the partnerships that we create with various organizations. Charity will not just reach the US but all over the world where help is needed.

At the beginning of this project, the charity will be via the decentralized platform that will be created and run using smart contracts. In the future, the main objective is to create the Freedom Wallet and an international exchange which will also help fund our charity programs. As we partner with health care clinics, we will work on having these clinics accept freedom token as a payment at a discount for their services. We will also create a team and accept partnerships to help with Research and development. We want to integrate blockchain technology into the health care industry. As this technology progresses, we will have participating clinics be the pilot for this revolutionary technology

Freedom Protocol will expand with each passing day. At each stage of the roadmap, donations will be done to organizations to help finance programs that will help veterans, homeless and low-income families that were affected by COVID-19.

Because Freedom Token is built on trust, we want to demonstrate our vision to our holders and invite them to join us on this journey. We worked on this project to create a token that is both practical and useful. We will demonstrate the changes and development we intend to implement in the next months.

# PROBLEM STATEMENT

Healthcare is a universal human right and integral to the life of every person. Advancements in medical technology have allowed for longer, healthier and higher quality lives. Much of these impressive advances have been in medical research and clinical care. Today, Biomedical and health research is facing a lot of problems. The three major problems include:

- ✓ COVID-19 is still affecting the lives of people
- ✓ The decision for whether to treat a patient in most of the cases depends upon the financial resources available and the financial outcome it may have. Treatment is started by keeping monetary values in mind rather than how it will impact the society and how it can improve the life of people in the society.
- ✓ Most of the people cannot afford high medical expenses, so most of the people are not able to access basic health facilities specially in 3<sup>rd</sup> world countries.

A steady and efficient influx of medical solutions is critical to ensure that society's (re)emerging medical needs are effectively met. Despite today's advancements in science and technology, drug development speed, costs, and success rates have not improved over the years and in some instances operating conditions have gotten worse. Ongoing research shows that the cost of drug development continues to rise with an average of 9% each year. Moreover, development cycle times have become longer and less predictable, indicated by the increasing incidence of project changes and delays. This has resulted in a situation where death rates for new COVID-19 cases are at an all-time low.

# SOLUTION

Freedom Token brings a solution for each of these points, among others.

- ✓ Charity will allow medical institutions and other organizations to have sufficient resources to be able to continue treatment of COVID-19.
- ✓ Charity wallet reflections will be used for charity purposes and expansion wallet reflections will be used for marketing, legal and other expenses to help Freedom protocol meet or exceed their goals. In the beginning freedom protocol will cover expenses until wallet reflections can cover costs
- ✓ Money collected from Charity Wallet will be directly used to help create programs to help the people in the US and around the world.

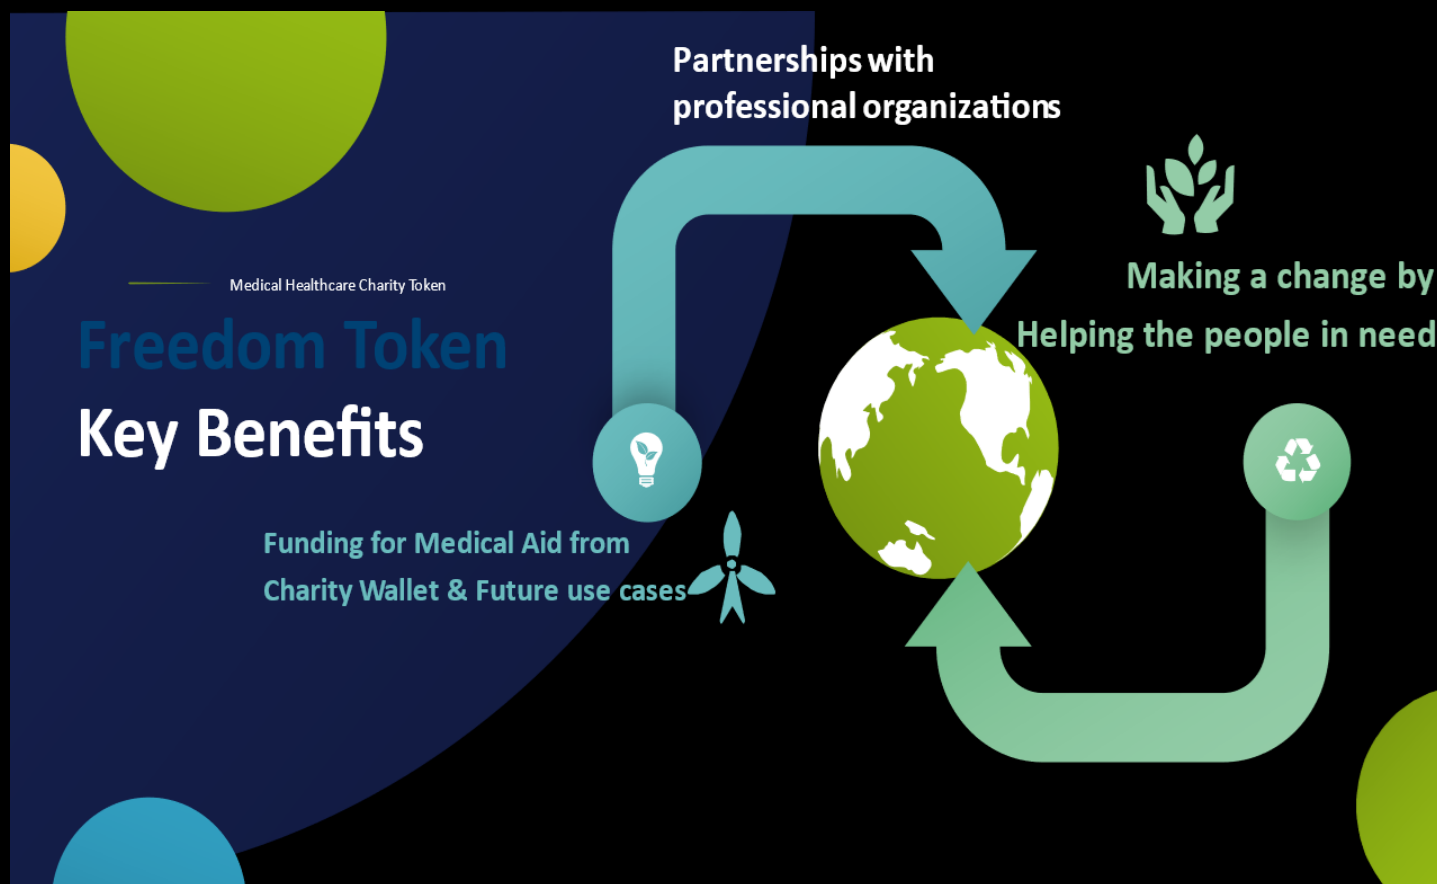

Freedom is building the blockchain-enabled medical ecosystem, serving, and connecting medical professionals across traditional organizational boundaries and domains. Our mission is to enable a future of smarter, safer, and more-efficient medical health systems where people are taken care of, and integrity is assured. Our overarching and holistic approach is therefore focused on consolidating the unconnected and authenticating clinical treatment globally. We believe we can distinguish ourselves by fully committing to a governance structure, strategy, and roadmap that each support our core mission. We understand that the solution to these current problems lies with the people who think with the heart and not only with economic performance, but pools will also allow both, to aid people and have reward in tokens. Freedom Token is a tool to help and build awareness of a problem that started centuries ago, the centralization and capitalization of a healthcare solution that could save the lives of many people and merge the future of cryptocurrencies with a problem present in the medical research area.

# SOLUTION

Continued

# BENEFITS

Freedom token will offer tremendous benefits to the holders, society and the health care industry. Interconnecting and working in a decentralized way it will allow the advancement in health care technology in the future and will help fight against the dangers of COVID-19 and other diseases. Once we integrate block chain technology it will allow everyone to be able get the medical treatment, they need quickly without needing to wait for info. Medical health professionals will be able to interconnect and create within the block chain so medical info is readily available to the patient and patient can choose who can see their private medical records.

Freedom token will donate with the power of our crypto currency (charity wallet) and through the partnerships that we create with organizations around the world. Charity will not just reach the US but all over the world where help is needed. We have a great opportunity to bring more awareness to medical companies and organizations in a positive light within the crypto sphere. We will conduct marketing campaigns including advertisement on crypto media, communicate with crypto influencers, & host informative video/audio updates to the community.

Certain programs and donations will include:

- ✓ COVID-19 PPE (Protective gear, gloves, masks, sanitizer etc.
- ✓ COVID-19 testing
- ✓ COVID-19 testing machines
- ✓ COVID-19 immune building (nutrition and vitamins)
- ✓ COVID-19 rehabilitation centers
- ✓ Immunization
- ✓ Medication
- ✓ Patient co pays
- ✓ Food banks

# RISKS

Freedom Token provides a lot of benefits to the investors, but on the other hand, it is not out of risk. At Freedom Token, our team believes that we should be transparent and declare the potential risks involved.

Like any other crypto coin out there in the market, Freedom Token is also volatile, due to the nature of trading crypto currency. The team is dedicated to limit exploits to the developmental growth of the token, this said the crypto world is host to possible exploits involving but not limited to flash loans and price pump and dumps, we cannot control investors. The market value of Freedom Token solely depends upon the number of people who buy it or sell it. As of now, Freedom Token cannot be mined or earned any other way than bought. It is version 1.0 of Freedom Token, and it will see a lot of improvement in the coming days. The market value of Freedom Token may be highly volatile at the start, but we will make every effort to bring it stability as future use cases are implemented.

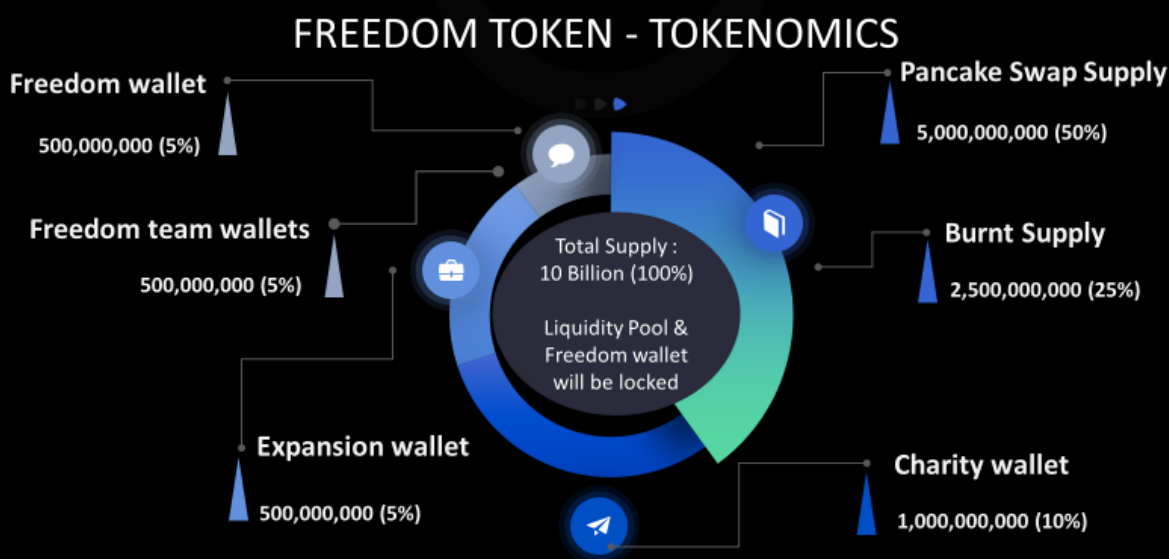

## Regulatory Risks

The blockchain industry is in the initial stage of its regulation. Governments of countries are in the process of studying blockchain technology, and some countries impose restrictions (for example, the United States, China and South Korea).

No legal documents are regulating the crypto industry yet - the laws can appear later and can significantly affect the activities of blockchain projects, including our project. We warn you that such laws can significantly limit and even stop the project activity, we are not responsible for the negative consequences associated with the possible regulation of the industry in the future.

# TOKENOMICS

## Token Allocation

TOTAL SUPPLY: 10,000,000,000 (100%)

FAIR LAUNCH SUPPLY: 5,000,000,000 (50%)

BURNED TOKEN: 2,500,000,000 (25%)

CHARITY WALLET: 1,000,000,000 (10%)

EXPANSION WALLET: 500,000,000 (5%)

FREEDOM PROTOCOL WALLET: 500,000,000 (5%)

FREEDOM TEAM WALLETS: 500,000,000 (5%)

LISTING ON PANCAKE SWAP: JULY 1<sup>ST</sup> 2021

EVERY TRANSACTION IS TAXED A 6% FEE, WHICH IS SPLIT 2 WAYS

4% FEE IS REDISTRIBUTED TO ALL EXISTING HOLDERS

2% FEE IS ADDED TO THE LIQUIDITY POOL

# KEY FEATURES

Some key features of Freedom Token are:

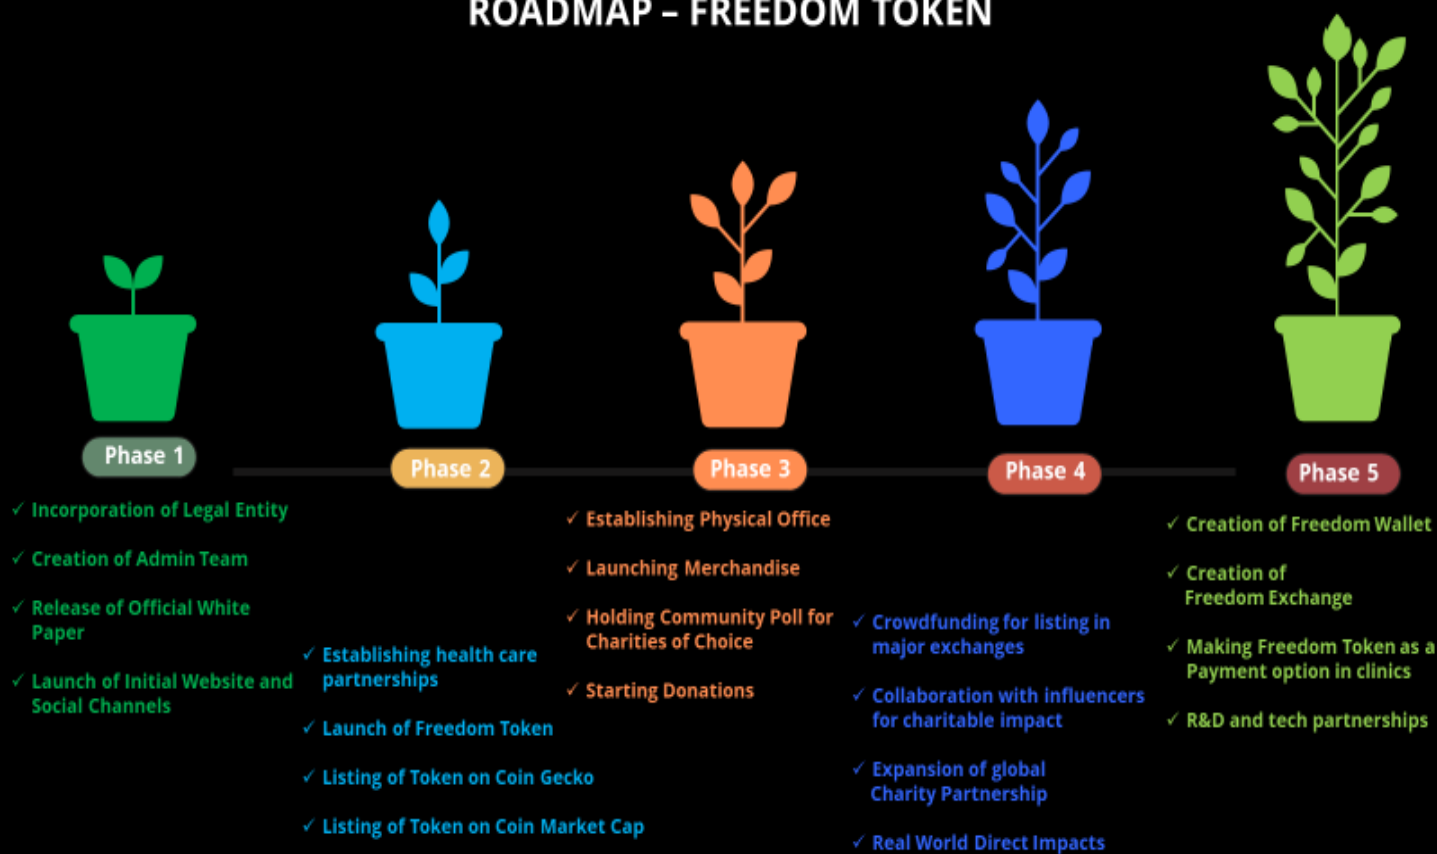

- Secured and safe: Freedom Token leverages a distributed peer-to-peer consensus network that cryptographically helps in securing every transaction.
- Quick transfer: Instant fund transfer globally is available with the help of fast block execution unlike traditional remittance, unmatched speed, and payment processors.
- Decentralized: Direct transactions among network participants without the presence of a central facilitator are enabled with the help of decentralized technology.
- Easy to use: User-friendly interface intended for seamless Real-world use cases.
- Scalability: Assures scalability for pacing up with the industry's transaction requirements, thereby facilitating mass adoption of cryptocurrency

# ROADMAP

## ROADMAP – FREEDOM TOKEN

# CONCLUSION

Freedom Protocol, who will manage Freedom Token, will be a group of professionals in the medical field. They will use the Charity wallet reflections for charity purposes and expansion wallet will be used for marketing, legal, and other expenses to help expand the project. As our project grows Freedom Protocol will focus on block chain technology and will create a wallet and international exchange.

Freedom protocol will also look for partnerships and do Research & Development on how to integrate block chain technology into the health care clinics.

As we partner with health care clinics, we will work on having these clinics accept Freedom Token as payment and be the pilot for block chain tech while still following health care regulations like HIPAA.

As Freedom Protocol grows and creates revenue from the development of this technology mentioned above, a percentage will be donated into the charity wallet so it can be used to Freedom Tokens cause.
